Subject:	Built In shopping basket is not working		
Description	<p>The built in shopping basket is being blocked by the session fixation fix.</p> <p>By default (and manual) the FE waits for the GPVar "recs" and then automatically stores things in the session. Unfortunately the session fixation fix changes the cookieid and id of the fe_user record to different values. The tslib_feuserAuth::record_registration function check whether these values are the same (which the fixation fix denies).</p> <p>Ingmar and I thought about this and we want to remove the check in record_registration.</p> <p>Will attach patch soon (maybe after the coding night)</p> <p>PHP:</p> <pre>/** * Enter description here... * */ class user_pleaseMichiel { public function justdoltDontAsk(\$content, \$conf) { debug(\$GLOBALS['TSFE']->fe_user->sesData); } } ?></pre> <p>=====</p> <p>TS:</p> <pre>config { doctype = xhtml_trans xmlprologue = none xhtml_cleaning = all }</pre> <p>1. Default PAGE object:</p> <pre>page = PAGE page.10 = TEXT page.10.value (<form action="index.php" method="post"> <input field="hidden" name="recs[tt_content][1]" value="3" /> <input type="submit" name="submit" value="machma" /> </form>)</pre> <p>page.includeLibs.myFunc = fileadmin/neverstorephphere/user_doesntmatter.php</p>		

page.20 = USER_INT
page.20.userFunc = user_pleaseMichiel->justdoltDontAsk

=====

See if there is data in the session.
