### Associated revisions

Revision 6810cb20 - 2008-12-30 14:32 - Robert Lemke

- FLOW3: (Cache) Introduced two new interfaces - for Cache frontends and backends

- FLOW3: (Cache) Fixed an issue with the File Backend: initializeObject() overrode the cacheDirectory setting even if it has been set through setter injection

- FLOW3: (Object) The property / argument type "reference" has been renamed to "object" (see also updated documentation)
- FLOW3: (Object) The object configuration option "constructorArguments" has been renamed to "arguments"
- FLOW3: (Object) In the code "Constructor Arguments" are now referred to simply as "Arguments"
- FLOW3: (Object) Implemented support for custom factories. Resolves #2110
- FLOW3: (Object) Implemented support for specifying arguments / properties for objects which are injected. Resolves #2109
- FLOW3: (Resource) Added the file\_exists() check again to the Class Loader. Ommitting the check resulted in hard-to-track error messages
- FLOW3: (Documentation) Updated the documentation. Still missing: custom factories and syntax of feature #2109
- FLOW3: (TestPackage) Adopted and cleaned up the Object related tests

## History

### #1 - 2008-11-12 12:16 - Robert Lemke

- Subject changed from Support constructor / factory arguments in Components injection configuration to Support constructor / factory arguments in Objects injection configuration

#### #2 - 2008-12-30 14:35 - Robert Lemke

- Status changed from New to Resolved

- % Done changed from 0 to 100

Applied in changeset r1670.
