

## TYPO3.Flow - Task # 2119

<b>Status:</b>	Resolved	<b>Priority:</b>	Must have
<b>Author:</b>	Robert Lemke	<b>Category:</b>	Object
<b>Created:</b>	2008-11-11	<b>Assigned To:</b>	Robert Lemke
<b>Updated:</b>	2010-10-20	<b>Due date:</b>	
<b>Sprint:</b>			
<b>PHP Version:</b>			
<b>Has patch:</b>			
<b>Complexity:</b>			
<b>Subject:</b>	Rename "component" to "object"		
<b>Description</b>			
<p>Although the whole concept of componentry still applies to FLOW3, the name "component manager" etc. is rather confusing, especially for developers new to FLOW3. Because technically the component manager and the factory are managing and creating just plain objects, it makes sense to rename them to object manager and object factory.</p> <p>Certain classes and methods will have to be renamed in a special way (ComponentObjectBuilder &gt; ObjectBuilder) but apart of that, a well-thought global search and replace will do.</p>			

### Associated revisions

#### Revision 1409a9f7 - 2008-11-11 12:16 - Robert Lemke

- FLOW3: (Component) Renamed "component" to "object" - everywhere. That means we now have an Object Manager instead of a Component Manager, an Object Factory etc. Resolves #2119

Globally adjusted all code for the above change.

#### Revision 78347cfe - 2008-11-11 12:24 - Robert Lemke

- FLOW3: (Component) Renamed "component" to "object" - everywhere. That means we now have an Object Manager instead of a Component Manager, an Object Factory etc. Resolves #2119

Globally adjusted all code for the above change.
