Sprint Focus:					
Subject:	Content Element Sitemap renders empty				
Description					
<p>Hi folks,</p> <p>in current 4.3 versions (beta and trunk) the standard sitemap does not work anymore. The rendering is empty. Such things as "menu of subpages" etc do work.</p> <p>regards</p> <p>Steffen</p> <p>(issue imported from #M12339)</p>

i can't reproduce. Sitemap is defined in tt_content.menu.20.2 and simply use HMENU without any configuration. I tested with all variations of rootpage (with(out)shortcut etc), renders all the time.

#2 - 2009-11-03 17:45 - Steffen Kamper

I looked on your site an all is correct, as on level0 all pages were "hide in menu". So sitemap is not able to render childs if they don't have a renderable parent.
