We won't remove deprecated stuff in 4.5 yet (LTS) but start doing so drastically in 4.6. So changed target version and keep it pending.

Regarding this issue, we'll introduce SwiftMail in 4.5, so these methods won't be needed for modern mailing efforts anymore anyway. We hope that some time after 4.5 is there, everyone switches from t3lib_htmlmail to t3lib_mail (SwiftMail based) anyway.

Note that the whole t3lib_htmlmail is deprecated as of 4.5, so we could remove it in 4.7.

And this particular removal has already been done by Christian Kuhn in #25103. See this change:
