Sprint Focus:	
Subject:	Extension manager does not search in extension titles when in "import extension" section

Description

Searching for extensions in the "import extension" section of EM only searches in extension keys.
It would be better to search also in extension titles.

In the "loaded extensions" or "install extensions" sections, this is already the case.

1) go to Extension manager
2) choose import extensions in the function menu
3) search for "static file cache"
4) see appended screenshots for the difference.

(issue imported from #M12482)
