

TYPO3.TYPO3CR - Bug # 2163

Status:	Resolved	Priority:	Should have
Author:	Christoph Blömer	Category:	Storage Backend
Created:	2008-11-12	Assigned To:	Karsten Dambekalns
Updated:	2011-05-05	Due date:	
Subject:	"no such table: namespaces" Exception is misleading		
Description			
<p>After typo3cr.db was changed to TYPO3CR.db the file TYPO3CR.db was created and the Exception was thrown because the new DB file has no tables.</p> <p>A NoSuchDatabaseException or MissingDatabaseException would make more sense before creating just an empty DB file.</p>

TYPO3CR:

- missing SQLite database file is now detected, fixes #2163

History

#1 - 2008-11-26 15:15 - Karsten Dambekalns

- *Category set to Storage Backend*

The error is indeed misleading. But SQLite simply creates an empty database if you connect and there is no database file, so this is rather an issue caused by the way SQLite behaves. For other databases the message would be more helpful.
