

Core - Bug # 21783

Status:	Closed	Priority:	Should have		
Author:	oliver leitner	Category:			
Created:	2009-12-03	Assigned To:			
Updated:	2013-05-09	Due date:			
TYPO3 Version:	4.2				
PHP Version:	5.2				
Complexity:					
Is Regression:					
Sprint Focus:					
Subject:	Switching Workspaces as a normal User (non admin) Cause Browser Crash in Internet Explorer 8				
Description					
if a normal user tries to switch workspaces, he gets the following error output:					
"Object required"					
When running ms js debugger, he lines out the following:					
In typo3/contrib/prototype/prototype.js					
Marked code:					
<pre>pointer: function(event) { return { x: event.pageX (event.clientX + (document.documentElement.scrollLeft document.body.scrollLeft)), y: event.pageY (event.clientY + (document.documentElement.scrollTop document.body.scrollTop)) }; },</pre>					
When closing the debugger, there are like 10 class/id/blah errors, that one needs to press no to warnings					
1. login as a normal user (redakteur whatever...) using internet explorer 8					
2. try to switch workspaces by the dropdown on top of the backend.					
(issue imported from #M12901)

History

#1 - 2009-12-03 14:11 - oliver leitner

that error also happens with admin users.

it happens with live and development workspace as well as with custom workspaces.

#2 - 2010-01-06 21:10 - Chris topher

Maybe related to #12532 and friends?

#3 - 2010-01-20 10:43 - oliver leitner

Sorry Christopher

0012532 doesnt solve the problem.

#4 - 2011-07-17 22:16 - Stefan Neufeind

Were you able to reproduce this with any recent version of TYPO3? Or at least 4.3 maybe?
