Is Regression:			
Sprint Focus:			
Subject:	Select navigation mode is obsolete		
Description			
In User Settings you can still choose between different kinds of navigation modes. "Selectorbox in top frame" and "Icons in top frame" are non-functional. It is best to remove the whole "Select navigation mode".

Hey Ben,

thanks for spotting this. I think we need to remove the whole alt_main.php backend file as soon as possible. This would be part of it.

Merry Christmas

#2 - 2010-05-23 14:57 - Chris topher

This is part of #22701, which finally aims to remove the old BE completely.
