Subject:	SQL error if i want to create a page by using "Page (inside)"		
Description			
<p>If I create a page by using the "Page (inside)" and click on save or select another page-type I allways get the error-message:</p> <p>2: SQL error: 'Incorrect integer value: " for column 'storage_pid' at row 1' (pages:NEW4b522b434065e)</p> <p>I don't know where exactly this bug is in the code because I don't have a backtrace :)</p> <p>(issue imported from #M13264)</p>

Hey, I've got the same problem if I want to create a page by using "Page (after)"

2: SQL error: 'Incorrect integer value: " for column 'storage_pid' at row 1' (pages:NEW4b522cbd215bf)

Only the method "Page (select position)" is working ...

p.s. If it's important I'm developing on Windows7 with the ZEND-Server Community Edition. The browser i've tested with is FireFox 3.5.7

#2 - 2010-01-16 22:27 - Simon Schick

Now I tried to create a specific content-type and this didn't work also ...

hey - If I'm the only one with this problem - let me know ...

2: SQL error: 'Incorrect integer value: " for column 'parent' at row 1' (tx_templavoila_tmplobj:NEW4b522e74f1544)

I can't create an TemplaVoilà-TemplateObject - but I can create an TemplaVoilà-DataStructure ...

Resolved as duplicate of #20052.

@Simon, this is a problem with mysql running in STRICT mode, please have a look at the duplicate issue.
