<b>Subject:</b>	New install tool refactoring uses FE layer for templating instead of t3lib_parsehtml				
<b>Description</b>					
Problem: The new install tool refactoring has a very bad dependency. This is BE functionality and depends on a FE extension -> class.tslib_content.php  Solution: Substitute all calls to \$this->contentObject-> to t3lib_parsehtml::  (issue imported from #M14069)
