Subject:	t3lib_compressor processes JSlibs, even when it's not supposed to to				
Description					
<p>While including the JSlibs (extjs, prototype,...) the PageRenderer calls processJsFile(), which passes the JS file through t3lib_compressor.</p> <p>This must only be done, if \$this->compressJavascript == TRUE</p> <p>(issue imported from #M14282)</p>
