## History

#### #1 - 2010-11-29 09:35 - Rens Admiraal

I had the same problem for files located in fileadmin/ which are configured in RTE.default.contentCSS Supplied is a patch which fixes the problem that the t3lib\_compressor class only handles files within the TYPO3 folder because it fails to create a valid path with this code:

substr(\$filename, strlen(\$GLOBALS['BACK\_PATH']))

## #2 - 2010-11-29 12:04 - Rens Admiraal

After some testing the solution seemed to be more complex, created a new patch (v2)

#### #3 - 2010-12-17 21:31 - Steffen Kamper

committed v3 to trunk rev 9836

# #4 - 2011-03-29 14:23 - Susanne Moog

- Target version deleted (4.5.0)
