PHP Version:	5.2		
Complexity:			
Sprint Focus:			
Subject:	Provide a way to see Install Tool DB passwords in the form		
Description The Install Tool passwords is now rendered in password type fields, which shows asterisk for the passwords. This is generally fine, but the usability for an admin is lowered at the same time. Some places there is only one field to add the password, and this can lead into unexpected errors, from typos. Solution: Provide a checkbox below the database password field, which shows the content of the field when checked. When unchecked the field is yet again a password field. (issue imported from #M14390)

History

#1 - 2013-05-22 09:09 - Alexander Opitz

- Category set to Install Tool
- Target version deleted (0)

#2 - 2013-09-14 22:03 - Christian Kuhn

- Is Regression set to No

AFAIK, the UX team wants a generic solution for **all** password fields in the backend. This should then be re-used in the install tool. I do not remember any issue handling this, though.

#3 - 2015-01-19 09:43 - Mathias Schreiber

- Tracker changed from Bug to Feature
- Target version set to 7.4 (Backend)

#4 - 2015-07-13 19:42 - Susanne Moog

- Category changed from Install Tool to 7 Install Improvements
