Sprint Focus:	
Subject:	SpriteIconApi getSpriteIconForRecord does not find default icon

Description

Throughout core there's often the case that we need a icon for an table.

this is often done via passing an empty array as "record" for such table.

currently spriteIcon does not find any icon if the table uses typeicon_classes in extTables.

The function has to bee improoved a little bit.

(issue imported from #M14466)
