| <b>Subject:</b>  | Close-action-icon not visible in Google Chrome 5   |                     |                   |
| <b>Description</b>   | <p>When editing a record the close-action-icon is no longer visible since sprite API was introduced in Google Chrome 5.</p> <p>The reason seems to be the empty <code>&lt;span&gt;&lt;/span&gt;</code>. If I add a <code> </code> in between the icon gets visible.</p> <p>(issue imported from #M14495)</p> |                     |                   |

### History

#### #1 - 2010-05-27 17:26 - Chris topher

Can you provide a patch for that?

#### #2 - 2010-05-27 17:29 - Niels Pardon

Well, just discovered that it's the same problem for the view-go-up and the document-new icons in the list module docheader.

Need to check whether I find an elegant way to solve this.

#### #3 - 2010-05-27 17:33 - Steffen Ritter

please consider the followup in 14486. Seems to fix these issues already

#### #4 - 2010-05-27 17:33 - Niels Pardon

There's already a patch on the core list in #22722 that fixes issue for me.

#### #5 - 2010-05-27 17:34 - Chris topher

So this one can be closed, when 14486 follow-up fixIconCss.diff is in; patch by Steffen Ritter.

Thanks for the feedback, Niels!

#6 - 2010-05-27 21:12 - Steffen Ritter

followup to 14486 committed to trunk...
