Sprint Focus:			
Subject:	Width of one paragraph of text in the Install Tool is too big		

Description

The text goes over the edge in the paragraph "[pageUnavailable_handling]"

Reproducable:
1. Login in to the Install Tool
2. Go to "All Configuration"
3. Jump to "[pageUnavailable_handling]"

(issue imported from #M14564)

History

#1 - 2010-06-20 15:29 - Chris topher

This is still an issue.

Interestingly it works correctly for (most?) other sections on that screen, but not for this one (although the sourcecode is basically the same...).

#2 - 2010-06-20 15:32 - Chris topher

I just checked that: It works correctly for all(!) other sections. This is the only one with that problem.

#3 - 2010-06-25 11:24 - Andy Grunwald

The Problem is the String "USER_FUNCTION:typo3conf/pageUnavailableHandling.php:user_pageUnavailable->pageUnavailable" whoch could not be breaked by the browser.

#4 - 2010-06-25 14:37 - Chris topher

So a simple space behind the "->" would fix that. A nobrainer in the end...

#5 - 2010-06-27 01:41 - Chris topher

Or even better: Adding the CSS definition

word-wrap: break-word;

can fix that.

#6 - 2010-11-03 20:15 - Marc Wöhlken

@christopher:
Is word-wrap really part of the css standard? AFAIK it's an IE invention and obviously does not work under Firefox...

Just tried adding "word-wrap: break-word; white-space: -moz-pre-wrap;" to the li-elements which worked fine.

Would it be appropriate to use such mozilla specific settings?!

#7 - 2010-11-03 20:59 - Chris topher

word-wrap only is part of CSS3 I think. So, it is not yet a standard, but I read that it already should work in Firefox.
But the ~~moz... property you propose is no standard either, is it? ;~~) Doesn't it work without that?

#8 - 2010-11-03 21:15 - Marc Wöhlken

"word-wrap: break-word" seems not to word under FF 3.6.x.

#9 - 2010-11-03 21:23 - Chris topher

OK.

Just take the solution you like best!
The same problem is there at 2 other places in the same file:
- The line displaying PATH_thisScript in Basic Configuration and
- The same line in the part "Clean up"
Would be great if you could fix that the same way then!

#10 - 2010-11-03 22:56 - Marc Wöhlken

Added a patch to solve this issue:
- added new class t3-install-description to "All configuration page"
- formatted that class: word-wrap: break-word; width: 48em;

@christoph: word-wrap works in FF when the element has a defined width.

#11 - 2010-11-03 23:05 - Marc Wöhlken

The same problem is there at 2 other places in the same file:
- The line displaying PATH_thisScript in Basic Configuration and

Works fine in TYPO3 4.4 / 4.5 under FF & IE8. Any info on which browsers have to be used to reproduce the problem?

> *- The same line in the part "Clean up"*

Could not see where this problem arises.

#12 - 2010-11-03 23:25 - Chris topher

> *- The line displaying PATH_thisScript in Basic Configuration*

Indeed! I just saw the screenshot
http://bugs.typo3.org/file_download.php?file_id=11892&type=bug
which is attached to #22975.
I just noticed: For me a path, which would be too long, is broken at a "-" sign in the path. And paths without such a "-" are broken at the slash next to the border of the div box. Great!

> *- The same line in the part "Clean up"*

Yes, sorry for the inconvenience. Seems like this line was removed since I last checked that.

#13 - 2010-11-03 23:31 - Marc Wöhlken

This works even when there is no "-" in the path. In my installation the word "pageUnavailable" gets split up across lines.

#14 - 2010-11-03 23:47 - Chris topher

Your patch works and solves the problem!

Send it to Core List!

#15 - 2010-11-04 16:28 - Marc Wöhlken

Patch is submitted to core list, give it a +1 if you like the solution.

#16 - 2010-12-17 10:21 - Steffen Gebert

Committed to trunk rev. 9816.
Thanks for your contribution, Marc!
