Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Subject:	Implement "context" support		
Description			
<p>It should be possible to put FLOW3 into different environment contexts. Examples are "optimized", "production", "development" and "testing".</p> <p>Other parts may then behave accordingly, for example the AOP would adjust the caching of the proxy classes depending on the selected mode.</p> <p>See also #339 about Components.ini format.</p>			

Associated revisions

Revision 7da2ee0b - 2008-02-27 13:55 - Robert Lemke

- FLOW3: (Reflection) Added getProperty() to T3_FLOW3_Reflection_Class. Fixes #370.
- FLOW3: (Cache) Implemented load() support for the File backend. Addresses #368.
- FLOW3: (Component) The component manager's default context is now "Development". Relates to #23.
- Testing: The Base Testcase now sets the cloned component manager's context to "Testing".
