Subject:	Forgotten styling: User Name at the top misses a CSS definition		

Description
The username at the upper right corner is styled inconsistently: - If the user does not have access to User Settings, the username is black and non-bold (only the definition inherited from body#typo3-backend-php). This is barely readable and looks as if the styling was forgotten. Adding a CSS class to #username should help. (This is done the same way, when you use the "Switch to User" Mode. There the style definition for color and boldness is in #username .su-user.) - If the user has access to the module User Settings, it is white and bold (definition from #username a). That's OK. Add the missing styling! (issue imported from #M14901)

Could you provide a patch, Christopher?

#2 - 2010-11-08 20:55 - Chris topher

Yes, I just did so.

#3 - 2010-11-08 23:48 - Jeff Segars

Committed to trunk in r9311 and 4.4 in r9312.
