Sprint Focus:			
Subject:	"View Item" does not resolve real MM Relations		

Description
The overview "View Item" displays (Listview -> Display Information Icon) does not resolve real MM Relations correctly. It always shows the first entry of the related database no matter what.
This seems to be a bug in all Versions (tried 4.3 and 4.4)
(issue imported from #M14949)

History

#1 - 2010-07-02 11:07 - Caspar Stuebs

This seems to be related to http://bugs.typo3.org/view.php?id=14831

within show_item.php it is necessary to pass the record uid.

see patch in bug 14831

I have not testet MM-Relations yet ...

#2 - 2010-07-03 17:33 - Caspar Stuebs

I have checked this problem for 4.4.0.

Within the show_item.php the uid has to be passed and in t3lib_BEfunc::getProcessedValue() there has to be a check, if the uid is passed.

see patch

#3 - 2010-08-22 19:04 - Francois Suter

Updated patches for 4.3, 4.4 and 4.5. For 4.3 the initial patch did not apply cleanly. The 4.5 patch (backported to 4.4) contains additional CGL cleanup.

#4 - 2010-08-22 19:14 - Francois Suter

Committed to:

- 4.3 in revision 8640

- 4.4 in revision 8641

- trunk in revision 8642
