Core - Bug # 23306

Status:	Closed	**Priority:**	Should have
Author:	Alienor.net	**Category:**	
Created:	2010-07-29	**Assigned To:**	Steffen Ritter
Updated:	2010-08-12	**Due date:**	
TYPO3 Version:	4.4		
PHP Version:	5.3		
Complexity:			
Is Regression:			
Sprint Focus:			
Subject:	DB browser is unusable		

Description

If you click on DB browser icon from, for example, the "db mount" field of a BE Group record, the usual page tree is replaced with the following error :

t3lib_error_Exception
PHP Catchable Fatal Error: Argument 2 passed to t3lib_iconWorks::getSpriteIconForRecord() must be an array, null given, called in [...]/typo3/class.browse_links.php on line 1922 and defined in [...]/t3lib/class.t3lib_iconworks.php line 735

This was introduced by the patch to the bug 14880 that added array type hinting to the second argument of getSpriteIconForRecord() method.
As no real record is found when $this->expandPage = 0 (the root page - which is selected by default), a null value get passed to the method, hence the error.
Since the selectable icon is not needed for the root page, the new patch adds a condition that checks if a valid record was found before calling the getSpriteIconForRecord() method and related code. TYPO3 4.4 and the trunk are concerned.
(issue imported from #M15292)

History

#1 - 2010-07-30 15:51 - Oliver Hader

I was not able to reproduce this issue.
Can you please give a step by step description on how to reproduce the behaviour? Thanks!

#2 - 2010-07-30 22:13 - Alexandre G

First, I wasn't clear enough on the version affected : 4.4.0 is not affected by this bug, but 4.4.1 is.

So here are the steps to reproduce, on a fresh install :
- Edit a BE user record
- In Options > DB Mount field, click on the folder icon ("Browse for records")
- If the error message is not yet there, click on the red arrow next to the root page > The error should happen
- In all subsequent attempts (until re-login), you should get the error message without having to click on the red arrow.

#3 - 2010-08-01 13:54 - Freddy Kühne

Same issue can be reproduced, when editing a template (browse for basis template, select root node) -> see ExceptionInfo.html

Error is also reported in system log:

Core: Exception handler (WEB): Uncaught TYPO3 Exception: #1: PHP Catchable Fatal Error: Argument 2 passed to

t3lib_iconWorks::getSpriteIconForRecord() must be an array, null given, called in C:\Program

Files\XAMPP\htdocs\typo3_441\typo3\class.browse_links.php on line 1922 and defined in C:\Program

Files\XAMPP\htdocs\typo3_441\t3lib\class.t3lib_iconworks.php line 735 | t3lib_error_Exception thrown in file C:\Program

#4 - 2010-08-01 15:54 - Oliver Hader

v2 of the patch was committed to SVN by Susanne

- trunk rev 8460
- 4-4 rev 8461

#5 - 2010-08-12 13:10 - Ingo Renner

released in

4.4.2
