Subject:	Sprite API: Missing icon "Undelete and edit" in DB Check		

Description
In the module "DB Check", option Fullsearch you can search the different database records. When you choose Advanced Search and check "Show even deleted entries" these entries are shown. Only the icon "Undelete and edit" is missing. You see that in the screenshot, the red question mark. (issue imported from #M15739)

History

#1 - 2010-12-16 22:24 - Ernesto Baschny

Still present in beta2.

#2 - 2011-01-14 12:16 - Patrick Broens

Added a patch.

t3lib_iconWorks::getSpriteIcon was called with the wrong iconname. The icon was already present.

#3 - 2011-01-14 12:32 - Patrick Broens

The icon for 'undelete only' has the name 'actions-edit-restore'.
The icon for 'undelete and edit' now has the name
'actions-edit-undelete-edit' because it was already registered with that
name. It would be nicer to have the name 'actions-edit-restore-edit' so
both use 'restore', but it might be possible extensions are using this
icon as well, and they will break if we change the name of the icon
itself. What do you think?

#4 - 2011-01-14 13:03 - Patrick Broens

Added a second patch which changes the name of the icon itself as mentioned in the notes above. But this change might break extensions which use
this icon.

How to test:

Change the name of the file

typo3/sysext/t3skin/images/icons/actions/edit-undelete-edit.png

to

typo3/sysext/t3skin/images/icons/actions/edit-restore-edit.png

and apply the patch

Hi,

as this issue is very old. Does the problem still exists within newer versions of TYPO3 CMS (6.1.7)?

#6 - 2014-07-01 18:04 - Chris topher

Issue still present in 6.2. Should be easy to fix since the patch is already there...

#7 - 2014-07-10 16:59 - Alexander Opitz

So can you bring the patches into Gerrit please?
