TYPO3.Flow - Bug # 2373

Status:	Resolved	**Priority:**	Should have
Author:	Christian Jul Jensen	**Category:**	Session
Created:	2008-12-26	**Assigned To:**	Robert Lemke
Updated:	2010-10-20	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	PHP session issues fatal error if session_save_path is not writable

Description

By default PHP uses /tmp as save-path for PHP Sessions, if this directory is not writable, PHP will die with a fatal error. FLOW3 should handle this in a more elegant by checking the writable of the save-path. Also the use of /tmp for session storage imposes a security risk on shared hosting, so we might consider making save-path configurable from within FLOW3 and not accepting and unset value (implicitly /tmp) as a valid path.
