Subject:	Nobrainier: Fix outdated wording in misc/advanced.htaccess		
Description	<p>In misc/advanced.htaccess it says in lines 25 following:</p> <ol style="list-style-type: none">1. If you have problems with this file, try using the minimal2. mod_rewrite.htaccess which is located in the typo3_src/misc/3. directory of this installation. <p>Delete these lines, because mod_rewrite.htaccess has been deleted (in 2005, rev. 772 already).</p> <p>There still is a hint to post questions in the mailing lists (see two paragraphs below the quoted part). This should already help people enough, if there are problems.</p> <p>(issue imported from #M16180)</p>
