| **Description** | | | |

This is the second milestone release of the new pagetree that improved a lot since the last version for Beta 1. You can find a list of fixes issues and finished tasks/features on forge. Please note that this list is not complete, because some issues of milestone 3 are already partly fixed or implemented in this milestone release

http://forge.typo3.org/projects/typo3v4-extjstrees/issues?fixed_version_id=736&set_filter=1&status_id=c

I have attached the complete diff since the first milestone release and the up2date extension itself. Please test this version and report any open issues and missing features on the forge project. Also we would be glad to see some more guys who want to help out for this project.
