### History

#### #1 - 2011-01-04 18:18 - Jeff Segars

Thanks for the bug report! Are there any specific steps for duplicating this issue? Does the Javascript error occur all the time and in all browsers for you?

#### #2 - 2011-01-05 08:33 - Björn Pedersen

The problem seems to occur sporadic, but I will investigate it further.

#### #3 - 2011-01-18 23:57 - Jeff Segars

I've finally found a way to duplicate this...ironically enough, its using the wec\_devo extension (from my company).

The extension inserts a ton of JS directly into the page and "</head>" is part of the JS that is inserted. This causes the header insertion in index\_ts.php to fail.

```
$TSFE->content = str_ireplace('</head>', $BE_USER->adminPanel->getAdminPanelHeaderData() . '</head>', $TSFE->content);
```

Hi,

as this issue is very old. Does the problem still exists within newer versions of TYPO3 CMS (6.1.7)?
