<b>PHP Version:</b>			
<b>Complexity:</b>			
<b>Is Regression:</b>			
<b>Sprint Focus:</b>			
<b>Subject:</b>	Rename Sysfolder to Folder		
<b>Description</b>			
<p>The term "SysFolder" is somewhat confusing.</p> <p>There are no other types of folders we need to differentiate the folder type from. I.e. there's no ExtensionFolder, UserFolder, ContentFolder or the like. The term is also quite technical and is specific to TYPO3.</p> <p>Since this can be confusing for new users and editors the suggestion is to rename the "SysFolder" page type to simply "Folder".</p> <p>(issue imported from #M16985)</p>
