History

#1 - 2011-04-03 09:32 - Jigal van Hemert

Only parts that will be left after this change are:

- t3lib_utility_PhpOptions - this contains a function to test for safe_mode
- tx_em_Parser_XmlAbstractParser::isAvailable() - this function needs to be looked at because of deprecation of the dynamic loading functionality in

PHP; I asked Steffen K. for his opinion

- install tool; this is refactored in a separate subproject
- reports module; it's useful to test here to report problems when safe_mode is enabled
- RTE HTMLarea; it's a separate subproject; asked Stan to take care
