

TYPO3.Flow - Bug # 25448

Status:	Closed	Priority:	Must have
Author:	Karsten Dambekalns	Category:	Object
Created:	2011-03-30	Assigned To:	Robert Lemke
Updated:	2011-04-12	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Use of undefined constant 'X' during prototype injection		
Description			
<p>When a prototype is needed for DI but has constructor arguments (that can be created through a factory), everything could be fine. But since ProxyClassBuilder, line 398, contains only unfinished code, the proxy class contains code like</p> <pre>/** * Autogenerated Proxy Method */ public function FLOW3_Proxy_injectProperties() { \$this->mailer = new \F3\SwiftMailer\Mailer(X); }</pre>			
<p>This then leads to exceptions in FLOW3 because PHP produces a notice: Use of undefined constant X - assumed 'X' in .../Data/Temporary/902451e70049/StaticObjectContainer.php line ...</p> <p>One way to reproduce this is to try and use SwiftMailer.</p>
