Updated:	2011-04-02	Due date:	
Has patch:			
Subject:	pagination is fairly simple and not usable in bigger projects		
Description			
<p>The pagination widget is fairly simple and not usable in bigger projects with more than 50 records. The reason is that it just renders all links which are needed. So if there are 1000 records and 10 per page, this results in 100 links on the page.</p> <p>Therefore it is needed to be able to skip the rendering of links at some point and implement something like:</p> <p>Additionally the pagination uses some hardcoded labels which could be fixed with the same patch.</p>

Revision e77ec815 - 2011-04-01 23:39 - Tobias Liebig

[FEATURE] improve fluid paginate widget

- forward port changes from extbase
- add configuration for maximum number of pages to display

Thanks to Georg Ringer for the initial patch.

Thanks to HDNET GmbH for sponsoring 120 beers during the bug auction.

- *Assigned To set to Bastian Waidelich*
- *% Done changed from 50 to 80*

thanks for your initial patch.

First I did some forward porting of the paginate widget from extbase/fluid to FLOW3/Fluid to make your patch apply in Fluid(v5). Then i did some renaming and minor refactoring.

The original code is from EXT:pagebrowse by Dmitry, right? We should mention that somewhere.

Once the patch is merged, it should be backported/synced to extbase/fluid, too.

Assigned to Bastian for review.

#6 - 2011-04-01 09:15 - Georg Ringer

yes original code is from pagebrowse. thanks for your work!
