

TYPO3.Flow - Bug # 2558

Status:	Closed	Priority:	Must have
Author:	Robert Lemke	Category:	Object
Created:	2009-02-04	Assigned To:	Karsten Dambekalns
Updated:	2010-10-20	Due date:	
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Property Injection doesn't work with subclasses		
Description			
<p>A property flagged for property injection will only be injected in the class it has been defined, not in one of the subclasses:</p>			
<pre>class Foo { /** * @var Baz * @inject */ protected \$baz; }</pre>			
<pre>class Bar extends Foo { public function doSomething() { \$this->baz->doSomething() } }</pre>			
<p>... will result in a fatal error because <code>\$this->baz</code> is not defined.</p>			

History

#1 - 2009-02-05 14:03 - Karsten Dambekalns

- Status changed from *New* to *Accepted*
- Assigned To changed from *Robert Lemke* to *Karsten Dambekalns*

#2 - 2009-02-05 14:21 - Karsten Dambekalns

- Status changed from *Accepted* to *Closed*
- % Done changed from *0* to *100*

No change required, works as expected.
