PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	Functional tests for persistence are broken

Description

When a database is configured globally it is used instead of the database configured in the FLOW3 package for Testing context.

If that is changed (by adding global configuration for Testing), the tests still fail due to tons of crap.

[!!!][BUGFIX] Make FunctionalTestCase usable for persistence tests

This change makes persistence tests usable with Doctrine (again).

It changes some important things: * enableTestablePersistence() has been removed * set the static property $testablePersistenceEnabled instead * persistence is now setup and torn down per testcase, not per test

See the adjusted tests for examples of needed adjustments.
