Has patch:			
Complexity:			
Subject:	Support SPLObjectStorage as container for references to other persisted objects		
Description			
<p>Currently references to other objects must be stored in an array or as a single property:</p>			
<pre>class Invoice { /** * @var array */ protected \$invoiceDetails = array(); /** * @var Customer */ protected \$customer; }</pre>			
<p>But in many cases it makes sense to store objects in an SPLObjectStorage:</p>			
<pre>class Blog { /** * @var \SPLObjectStorage */ protected \$posts; }</pre>			
<p>By using the SPLObjectStorage we can assure that no post can be added twice to a blog.</p>			
<p>The Persistence Manager should therefore support SPLObjectStorages</p>			

Associated revisions

Revision 492958c6 - 2009-03-05 16:10 - Karsten Dambekalns

FLOW3, TYPO3CR:

- persistence now supports properties of type \SplObjectStorage, fixes #2621
- general cleanup in persistence backend and data mapper

- thorough rewrite of the unit tests for persistence backend and data mapper
