

TYPO3.TYPO3CR - Task # 2623

| | | | |
|---|--------------------------------|---------------------|--------------------|
| Status: | Resolved | Priority: | Should have |
| Author: | Robert Lemke | Category: | FLOW3 Persistence |
| Created: | 2009-02-12 | Assigned To: | Karsten Dambekalns |
| Updated: | 2011-05-05 | Due date: | |
| Sprint: | | | |
| Subject: | Clean up Data Mapper test case | | |
| Description | | | |
| <p>The tests in the data mapper cover too many methods at once - basically it's functional tests for the whole class (and some others) by calling the map() method.</p> <p>Please split up the tests so they only focus on one method at once and mock the others (ie. work with a mocked DataMapper in the first place).</p> <p>see thawPropertiesSetsPropertyValues()</p> | | | |

Associated revisions

Revision 69d850aa - 2009-02-12 16:59 - Robert Lemke

- FLOW3: (Object) In the Object Builder renamed createSkeleton() to createEmptyObject and all *SetterProperties() method to *Propertiers().
- FLOW3: (Object) Moved the thawProperties() method to the TYPO3CR package
- TYPO3CR: Cleaned up (a bit) the Data Mapper test case. Needs more work! Refs #2623
