PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Wrong doc comment in proxy class breaks ReflectionService->getMethodTagsValues		
Description			

The method ReflectionService->getMethodTagsValues does a MethodReflection on the given class. But the new proxy mechanism generates a wrong method doc comment (tag values in one line).

Revision ddb79073 - 2011-05-04 16:51 - Christopher Hlubek

[BUGFIX] Several AOP bugfixes

This change fixes several small but blocking issues:

- AOP runtime evaluations with Doctrine collections not supported
  (e.g. "in" or "contains" with ArrayCollection)
- Method tagged with pointcut filter does not work (needs a test)
- Method doc comment in generated proxy method is not correctly
  annotated, causes strange behavior with reflection

Resolves: #26565
Change-Id: I1987e582a195e8913b7c80fa26ceeb3bbd0319f6
