

## Core - Bug # 26741

<b>Status:</b>	Rejected	<b>Priority:</b>	Must have
<b>Author:</b>	Arno Dudek	<b>Category:</b>	Backend User Interface
<b>Created:</b>	2011-05-11	<b>Assigned To:</b>	Steffen Gebert
<b>Updated:</b>	2012-10-08	<b>Due date:</b>	
<b>TYPO3 Version:</b> 4.5			
<b>PHP Version:</b>			
<b>Complexity:</b>			
<b>Is Regression:</b>			
<b>Sprint Focus:</b>			
<b>Subject:</b>	Error at renderMode tree		
<b>Description</b>			
Using v4.5.0 / v4.5.2			
Firefox 4.0.1			
I got an PHP error in the Log-Module when using the renderMode tree in TCA:			
Core: Error handler (BE): PHP Warning: Missing argument 2 for extDirect_DataProvider_BackendUserSettings::addToList() in /Volumes/Jobs/adgrafik/000000-TYPO3			
Develop/typo3_4.5.2.ip.dev/t3lib/extjs/dataprovider/class.extdirect_dataprovider_beusersettings.php line 107			
This happens when the form is open.			
Found the line where the problem is:			
File class.t3lib_tceforms_tree.php (3 matches) Line 176			
<pre>expandnode: function(node) {     top.TYPO3.BackendUserSettings.ExtDirect.addToList("tcaTrees." + this.uclid, node.attributes.uid); }</pre>			
TCA-config:			
<pre>'type' =&gt; 'select', 'size' =&gt; 3, 'autoSizeMax' =&gt; 15, 'minitems' =&gt; 0, 'maxitems' =&gt; 99, 'foreign_table' =&gt; 'tx_ext_domain_model_category', 'foreign_table_where' =&gt; 'AND (tx_ext_domain_model_category.sys_language_uid = 0 OR tx_ext_domain_model_category.l18n_parent = 0) ORDER BY tx_ext_domain_model_category.sorting', 'MM' =&gt; 'tx_ext_category_layer_mm', 'MM_opposite_field' =&gt; 'layers', 'renderMode' =&gt; 'tree', 'treeConfig' =&gt; array(     'parentField' =&gt; 'parent_category',     'appearance' =&gt; array(         'expandAll' =&gt; true,         'showHeader' =&gt; true,     ), )</pre>			

),

Tracing the variable `node.attributes` with firebug:

```
Object { iconCls="t3-icon t3-icon-tcareco..._model_category-default", text="c-test", mehr...}  
Object { iconCls="t3-icon t3-icon-tcareco..._model_category-default", text="Category", mehr...}  
Object { text="TYPO3 StandardTree", id="root", mehr...}
```

The first line is the category, the second the root. The last one have no uid set.

Hope this will help.

Ig arno

- *Status changed from New to Needs Feedback*

I'm not too deep into the whole tree stuff, so maybe the answers to my questions are rather obvious... How is the data for the tree provided? Could it be a problem with your data provider or the node? As I see it, you can only store the expansion state for nodes with a uid - and that is obviously missing here.

##### #2 - 2011-09-14 09:26 - Arno Dudek

- *File first\_run.png added*
- *File second\_run.png added*

The data will be stored as expected. I had never a problem with this.  
But it produced an error in the "TYPO3-Log" every time a form is opened.

I made some screenshots to show you.  
In the file "first run" you'll see `node.attributes.uid = "4"`. This comes for every category.  
The file "second run" shows you the root of the tree. There the property "uid" is missing.

##### #3 - 2012-08-27 17:21 - Björn Pedersen

Same as <http://forge.typo3.org/issues/31978> (which is newer, but has better analysis)?
