TYPO3.Party - Bug # 26764

Status:	Resolved	**Priority:**	Must have
Author:	Heiko Kromm	**Category:**	
Created:	2011-05-11	**Assigned To:**	Karsten Dambekalns
Updated:	2015-03-16	**Due date:**	
Affected Flow version:			
Subject:	ElectronicAddressValidator does not work		

Description

I think the ElectronicAddressValidator does not work with FLOW3 beta1.

It expects the $addressValidator to return a value, but for example the EmailAddressValidator has no return value.

Also it tries to call the undefined method getErrors on the addressValidator.
