| Status: | Accepted | Priority: | Should have |
| Author: | Christopher Hlubek | Category: | Reflection |
| Created: | 2011-05-11 | Assigned To: | Karsten Dambekalns |
| Updated: | 2013-02-14 | Due date: | |
| PHP Version: | | | |
| Has patch: | No | | |
| Complexity: | | | |
| Subject: | Support class schema features for every reflected class | | |
| Description | | | |
| <p>Some features of the reflection in FLOW3 are only available through the class schema, e.g.:</p> <ul style="list-style-type: none">- Property types- Check if a property is an array or multi-valued <p>The problem is, that the class schema is only generated for entities or value objects. There should be some kind of general class schema for non-persistent classes or reflection service methods to get this information.</p> | | | |

History

#1 - 2011-05-16 09:20 - Sebastian Kurfuerst

- Target version deleted (1.0 beta 1)

I agree with that, but not for 1.0beta1 anymore.
