Subject:	Advice can only be declared on public methods
Description	

Advice can only be declared on public methods. This should work for protected methods, too.

FLOW3:

- fixed use of get_class_methods in reflection service and proxy class builder, fixes #2683
- made Router.findMatchResults() protected (was blocked by #2683)

History

This is caused by "unexpected" behaviour of PHP. get_class_methods() returns only names of public methods, but is used to fetch the available methods. This is the case also in the Reflection\Service.

#3 - 2009-03-02 15:55 - Bastian Waidelich

It seems, you gotta use \ReflectionClass in order to fetch private and protected methods of a class.
