

TYPO3.Flow - Bug # 26862

Status:	Resolved	Priority:	Must have
Author:	Sebastian Kurfuerst	Category:	Persistence
Created:	2011-05-17	Assigned To:	Karsten Dambekalns
Updated:	2011-06-07	Due date:	2011-05-18
PHP Version:			
Has patch:			
Complexity:			
Affected Flow version:			
Subject:	Doctrine\Query is not serializable		
Description			
<p>For widgets, it is crucial that Query objects are serializable and deserializable, so one should be able to do:</p> <pre>\$newQuery = unserialize(serialize(\$query)) \$newQuery->execute() (or something else)</pre> <p>Maybe a functional test for this would be nice?</p> <p>One thing I already discovered further is that the properties in QueryResult should be protected, not private.</p> <p>Greets, Sebastian</p>
