TYPO3.Flow - Bug # 26886

Status:	Resolved	**Priority:**	Must have
Author:	Bastian Waidelich	**Category:**	Resource
Created:	2011-05-18	**Assigned To:**	Sebastian Kurfuerst
Updated:	2011-05-20	**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	Uploaded resources get lost on validation errors
Description	

If a resource is created through an upload (via ResourceTypeConverter) and a validation error occurs, there is currently no way of retrieving the resource in the referring action (neither from the controller nor in Fluid).

One solution would be to always persist the ResourcePointer on creation and extend the ResourceTypeConverter so that it can handle a serialized string that contains the Resource hash and required meta info (mime type, filename, ...)

Revision 3fd0ed84 - 2011-05-19 11:55 - Sebastian Kurfuerst

[+BUGFIX] (Resource): Fix file upload

  - ResourcePointer instances are now automatically created (or fetched)
    as soon as an image is uploaded.
  - the ResourceTypeConverter can now build Resource objects which
    have been uploaded before.
