[BUGFIX] Purge Doctrine proxies that are no longer needed

With this change the proxy target directory is emptied before Doctrine proxies are (re)built, removing outdated proxy classes.

This solves fatal errors when (proxied) classes are removed, and thus can no longer be found when referenced from their heirs.

One note about the Doctrine Cache: if APC is used and data / schema is changed from the command-line, the APC cache of the webserver cannot be flushed.

#2 - 2011-06-25 12:26 - Karsten Dambekalns

- Target version set to 1230

Thanks for the hint! No way?

#3 - 2011-10-20 01:43 - Karsten Dambekalns

- Target version deleted (1230)

#4 - 2012-03-14 22:21 - Karsten Dambekalns

- Has patch set to No

Metadata is a problem that is probably solved, but proxy classes stay around for too long. I deleted a package and the Doctrine-built proxy was not removed...
