Description

I uploaded an image with uppercased filename: me.JPG

The image is referenced from the profile page as this:
https://t3con11-frankfurt.typo3.org/_Resources/Persistent/c6475c7fa6c7650bc52b1ef1ea83ae836e1d49d8/me.JPG
which results in a 404

The upload itself seems working, but the extension got lowercased:
