TYPO3.Fluid - Feature # 27120

Status:	Rejected	**Priority:**	Should have
Author:	Fernando Arconada	**Category:**	
Created:	2011-05-29	**Assigned To:**	
Updated:	2012-03-12	**Due date:**	
Has patch:	No		
Subject:	filters for ViewHelpers and templates		

Description

You dont always want you HTML escaped. ViewHelpers could have filter attribute to avoid HTML escaping or for using you filter

<f:myviewhelper argument="{blas}" filter="raw" />
<f:myviewhelper argument="{blas}" filter="removeBadWords" />

<f:section filter="raw" </f:section>

<f:filter type="raw">
  portion of code inside my template
<f:filter>

Filters could be pluggables at Package level or framework

History

#1 - 2011-05-29 12:04 - Sebastian Kurfuerst

- Status changed from New to Needs Feedback

if I understand you correctly what you want, that's already possible using the Raw ViewHelper:

http://git.typo3.org/FLOW3/Packages/Fluid.git?a=blob;f=Classes/ViewHelpers/RawViewHelper.php;h=36e310e40c00c53c354110ac260ccb3dcc28f4d;hb=HEAD

Furthermore, ViewHelper arguments are never escaped.

Greets,

Sebastian

Mostly this Twig concept but adapted to Fluid and without nesting in another tag

http://www.twig-project.org/doc/advanced.html

#3 - 2012-03-12 19:04 - Christian Müller

- Status changed from Needs Feedback to Rejected

This kind of settings probably wont be introduced anytime soon as the functionality is already there with the raw viewhelper, so I am closing this ticket for now.
