[+FEATURE] First real selenium tests for the Phoenix backend

They work in Firefox and in Chrome so far.

Tests the following:

- Breadcrumb Menu behavior
- Page Properties Dialog (including Updates of Page Title)
- Move Page Dialog (really moving pages)
- Create Page Dialog (Creating pages, validation errors)
- Delete Page
- Enter and leave Editing Mode

Sometimes, the "Create Page" tests fail because of a wrong ordering of nodes. However, this is a bug in TYPO3CR which needs to be fixed, and the tests themselves are correct.

Needed changes for the tests to run successfully:
