Subject:	Creating an already-deleted node leads to an error		
Description			
Try the following:			
Create a node with nodeName "test"			
Delete this node			
Create another node with nodeName "test" (at the same place)			
-> Should work, but does not.			
Suggested solution: Create followed by Delete should directly remove the node (when the changes have not been committed yet to live workspace).

Bulk-closing issues because they are

- not relevant anymore due to the sproutcore based backend
- or already implemented in the meantime.
