TYPO3.Flow - Bug # 27170

Status:	Resolved		**Priority:**	Must have
Author:	Christopher Hlubek		**Category:**	Persistence
Created:	2011-05-31		**Assigned To:**	
Updated:	2011-06-01		**Due date:**	

PHP Version:	
Has patch:	
Complexity:	
Affected Flow version:	
Subject:	countByProperty does not work

Description

A magic count method with property (e.g. countByName) does not work with the current Doctrine implementation of count() in F3\FLOW3\Persistence\Doctrine\Query:

```
1 public function count() {
2    try {
3       $dqlQuery = clone $this->queryBuilder->getQuery();
4       $dqlQuery->setHint(\Doctrine\ORM\Query::HINT_CUSTOM_TREE_WALKERS, array('F3\FLOW3\Persistence\Doctrine\CountWalker'));
5       return (int)$dqlQuery->getSingleScalarResult();
6    } catch (\Doctrine\ORM\ORMException $e) {
7       return 0;
8    }
9 }
```

The problem seems to be the clone of the query which results in an empty parameter array when executing the cloned query.
