

Core - Bug # 27287

Bug # 46389 (Accepted): Faulty Workspace Placeholders

Status:	Closed	Priority:	Must have
Author:	Georg Ringer	Category:	Backend API
Created:	2011-06-08	Assigned To:	
Updated:	2014-01-06	Due date:	
TYPO3 Version:	4.6		
PHP Version:			
Complexity:	hard		
Is Regression:	No		
Sprint Focus:			
Subject:	Wrong languages in page module & Fatal error		
Description			
<p>The function <code>exec_languageQuery</code> in <code>cms/layout/db_layout</code> doesn't care about workspaces which brings a lot of troubles including a fatal error</p> <p>How to reproduce:</p> <ol style="list-style-type: none">1. You need to have at least 2 <code>sys_language</code>2. Create a page in live WS & create a translation in language 13. Switch to a workspace and create a translation in language 24. Switch back to live and go to the page5. => Booom			
<p>It would be easy to use a typecast in <code>class.tx_cms_layout.php</code>, line 685 below the <code>"list(\$lpRecord);</code></p> <pre>\$lpRecord = (array)\$lpRecord;</pre>			
<p>please proceed with that patch to see further problem: When you switch back to live workspaces, you will now see both languages on that page but the language #2 has been created in a workspace, so it shouldn't be visible, right? You will also see the 2nd language in the select box at the top left corner of the module.</p> <p>Hiding the language would be very easy:</p> <p><code>cms/layout/db_layout.php</code> in function <code>exec_languageQuery</code> below the <code>\$exQ = t3lib_BEfunc::deleteClause</code> add this line</p> <pre>t3lib_BEfunc::versioningPlaceholderClause('pages_language_overlay');</pre>			
<p>Now everything looks fine as you only see the language #1 which has been created in live workspace and you can also remove the typecast and it still works but there is now another issue:</p> <p>if you want to create the 2nd language in live WS, you will have this language twice (easy to spot in the list module).</p> <p>So I really don't know how to proceed and what the best way is.</p> <p>thanks for feedback, also for retesting everything!</p>			

History

#1 - 2011-08-29 12:52 - Andreas Wolf

- *Complexity set to hard*

I guess we will need to have some kind of placeholders for language overlays that were created in a draft workspace - like with movement placeholders. Or do you see another possibility, Georg?

#2 - 2013-03-17 21:12 - Oliver Hader

- *Parent task set to #46389*

#3 - 2013-07-30 19:56 - Philipp Gampe

- *Category changed from Backend User Interface to Backend API*

- *Status changed from New to Needs Feedback*

Still valid?

#4 - 2014-01-06 11:15 - Alexander Opitz

- *Status changed from Needs Feedback to Closed*

- *Is Regression set to No*
