Revision 4e4ebf30 - 2011-06-24 18:02 - Karsten Dambekalns

[FEATURE] Read migrations from active packages

It is impractical to keep migrations in a distribution-wide folder,

so with this change the migrations are read from all active packages.

Adds the current schema as a MySQL migration as well.

If you have been using FLOW3 in the past, you should have this already.

To mark the migration as already existing run

  flow3:doctrine:migrationversion --version 20110613223837 --add

Resolves: #27491
