| Subject: | TYPO3_lastVisitedUri causes problems with non hostname paths for rootpages | | |
| Description | <p>The cookie TYPO3_lastVisitedUri is set with the path to the current page in TYPO3/Resources/Private/TypoScriptObjects/Head.html</p> <p>This works fine if you're using the hostname as the root for your website (http://localhost/). But if you're using something like http://localhost/Web/ it doesn't work on the rootpage.</p> | | |

[BUGFIX] Fix TYPO3_lastVisitedUri for subdirectories

When generating TYPO3_lastVisitedUri a wrong path would be stored for URLs ending with a / but not being "/" at the same time:

/foobar/ -> /foobar/

should be

/foobar/ -> /foobar/{node.name}.html

instead.

Change-Id: Ie214f5b199460d950f8b2bb6e386268a44e11b1d

Fixes: #27503
